

The BaptistryUK baptism pool heater

Probably the only purpose built baptism heater on the market. Designed to heat large baptistries of any depth.

- Two 2.4kW heaters (4.8kW total) to cope with baptistries up to 5000 litres (1100 gals.)
- Built in water sensor for safety*
- Long flexes for any depth of baptism
- Stable and control box kept safely away from water
- Thermostatic control
- Compact and easily stored
- Simple to use
- Runs off standard plugs - no installation costs
- Long service - we have heaters out there that are over 10 years old and going strong
- Repair service if they get damaged

Baptistry Heater

The Baptistry heater is designed to heat the water in the baptistries where a hot water supply is not available.

Technical information: two 2.4 KW heating elements (i.e total 4.8kW). The heater must be plugged in to two separate sockets and not into a two plug adaptor or plug board. Heating times will vary according to the initial temperature of the water.

The 4.8 Kilowatt heater comprises:

2 x 13 amp plugs
20M x PVC covered 1.25mm mains cable
4M x 6 core signal cable
ABS splash-proof control box containing PCB (IP44 rated)
Grey PVC or Blue Foamalux perforated heater box containing:
2 x 2.4 kW stainless steel elements
1 x liquid level sensor
1 x temperature sensor
with all wiring and connections encapsulated in epoxy potting compound
Submersible heater section is IP68 rated.

*Please note. It is imperative that the unit is not switched on outside water. The water sensor cannot be used as an alternative to this. The sensor is only an additional safety precaution.
